PROFESSIONAL SUMMARY

Senior Front-End Engineer with 10+ years of experience delivering high-impact web and mobile applications across fintech, healthcare, energy, and enterprise sectors. Proven track record leading cross-functional teams, building accessible design systems (WCAG 2.2), and integrating AI/LLM tooling to accelerate delivery. Actively building full-stack AI-powered products with Next.js 15, Prisma, and Claude API — bridging engineering and product thinking in remote, Agile environments.

PROFESSIONAL EXPERIENCE

Senior Web UI Developer

Sep 2023 – Jul 2026

Globant · Remote · Mexico

Stack: *Flutter, React, Angular, Java 8-17, AI/LLM Orchestration, WCAG 2.2, Material 3*

- Architected and led delivery of a production-ready Design System in Flutter for Employbridge's mobile app, translating Figma designs into Atomic-architecture components compliant with Material 3 and WCAG 2.2 — shipped 2 months ahead of schedule.
- Designed and operated an AI orchestration pipeline (Claude + Gemini) to automate component scaffolding, accessibility audits, and code reviews; reduced per-component delivery time by ~40% and established a repeatable LLM-integration playbook adopted across the team.
- Directed AI-assisted development workflows — prompt engineering, context management, output validation — enabling a small team to sustain the velocity of a team twice its size.
- Engineered a React-based PoC to evaluate next-generation front-end patterns, achieving a 30% performance uplift through optimized color schemes, responsive layouts, and component reusability.
- Contributed to Java 8 to 17 backend migration, improving platform performance by 25% and delivering new features — including digital document signing — for a loan platform serving 5K+ customers.

Senior Software Developer

Jul 2023 – Sep 2023

CASPEX · Remote · Mexico

Stack: *Angular, WCAG 2.2, UI/UX Redesign*

- Led a full redesign of the Cordiance platform UI, delivering a modern, WCAG 2.2-compliant experience that increased user engagement by 20%.
- Introduced a new design system covering accessible color contrast, typography, and navigation patterns, standardizing the visual language across all application modules.

Principal Software Developer

Aug 2022 – Mar 2023

Nearshore Technology · Remote

Stack: *React, Node.js, RESTful APIs, Performance Optimization*

- Designed and implemented scalable solutions for complex technical requirements, significantly reducing average bug-resolution time through proactive debugging and code optimization.
- Streamlined internal workflows by building RESTful web services and intuitive front-end interfaces, improving cross-team process efficiency by 25%.

Senior Software Developer

Feb 2022 – Aug 2022

Persistent Systems · Remote

Stack: *Angular, Java, Node.js, EdTech*

- Built innovative tools and interactive features for an education platform, improving user experience scores by 10% and streamlining educator workflows across multiple departments.

- Expanded scope to full-stack development (Java + Node.js), improving project delivery speed and strengthening cross-team collaboration.

Senior Software Developer · Tech Lead

Feb 2021 – Feb 2022

Unosquare · Remote

Stack: *JavaScript, Team Leadership, Virtual Events*

- Directed a team of 4 engineers — managing career growth, sprint prioritization, and performance reviews — while maintaining a high-delivery culture that consistently hit project goals.
- Developed interactive virtual event platforms on Hubb.me using vanilla JavaScript, increasing user engagement by 25% and supporting thousands of concurrent participants.
- Maintained 98% client satisfaction through proactive communication, issue resolution, and reliable cross-team coordination.

Software Engineer E2

Oct 2017 – Feb 2021

General Electric · Queretaro, Mexico

Stack: *Angular, Java, CI/CD, WCAG 2.2, Enterprise Systems*

- Delivered full-stack development across multiple enterprise projects, improving platform reliability by 25% through seamless front-end/back-end integration.
- Led UX, API development, and unit testing for GE Renewables System Data Management, improving data accessibility and reducing delivery time by 30%.
- Architected the Orion system end-to-end: database design, CI/CD pipelines, WCAG 2.2 compliance, and full Agile participation (sprint planning, PR reviews, algorithm optimization).

Mid Software Developer

Sep 2015 – Sep 2017

Stefanini · Queretaro, Mexico

Stack: *Angular, Java, SOAP, IBM WebSphere · Clients: Santander, Walmart*

- Developed Angular front-end interfaces and API services for Santander Bank, enhancing system usability across 5+ internal departments.
- Built back-end web services for Walmart Vitamedica, integrating a comprehensive medical network supporting thousands of daily transactions.
- Implemented SOAP services with JUnit test coverage >90%, reducing post-release defects by 15%; managed IBM WebSphere configurations for deployment stability.

Junior Software Developer

Jan 2014 – Aug 2015

SOLSER SISTEMAS · Queretaro, Mexico

Stack: *Java, WebSphere, JBoss, jQuery · Clients: Libertad Financial, Santander*

- Designed and delivered web services and data models for Libertad Financial Services, achieving 100% compliance with internal security and privacy standards.
- Optimized WebSphere and JBoss configurations for Santander Bank projects, enhancing system performance and deployment stability by 25%.
- Reduced front-end maintenance time by 20% through modular jQuery templates; introduced process improvements that raised development productivity by 15%.

FREELANCE & PERSONAL PROJECTS

Irv. B Music Studio — AI-Powered A&R Assistant

2025 – Present

Independent / Portfolio Project · Remote

Stack: *Next.js 15 (App Router), TypeScript, Tailwind CSS v4, Prisma 6, Neon PostgreSQL, Claude API, NextAuth.js*

- Architecting a full-stack AI-powered platform for independent musicians combining A&R feedback, song evaluation, and audience analytics in a single product.
- Designed and implemented the authentication system (NextAuth.js + Prisma + Neon PostgreSQL) and monorepo scaffold from scratch, following production-grade patterns.
- Integrated Claude API as the AI engine for song evaluation and creative feedback, applying prompt engineering and LLM orchestration patterns developed at Globant.
- Bridging two professional domains: software engineering and music production (active under the Irv. B Music alias on DistroKid / major streaming platforms).

LexIA — AI Legal Document Evaluator

2024 – 2025

Independent / Portfolio Project · Remote

Stack: Flutter, Node.js, Claude API, BullMQ, Redis, PostgreSQL, Stripe, Firebase FCM

- Built a mobile app that submits legal documents for AI-powered evaluation using Claude API as an asynchronous AI judge, returning structured rubric-based assessments.
- Implemented async job processing with BullMQ + Redis, Stripe payments, FCM push notifications, and dynamic rubric tables in PostgreSQL — end-to-end solo project.
- First production integration of the Claude API; established patterns for context management, structured output parsing, and error handling later applied to Globant workflows.

Personal Portfolio — irvinherrera-dev.vercel.app

2024 – Present

Independent · Remote

Stack: Angular 17+, SSR, Vercel, GitHub Actions, CI/CD

- Designed and deployed a personal engineering portfolio with Angular SSR, configuring CI/CD pipelines via GitHub Actions and deploying to Vercel from scratch.
- Showcases design system, accessibility, and AI integration work across professional and personal projects.

TECHNICAL SKILLS

Front-End: Flutter, React, Angular, Vue, Next.js 15, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS v4

Back-End: Java (8-17), Node.js, Python, Kotlin, SQL, RESTful APIs, SOAP, GraphQL, Prisma, Neon PostgreSQL

AI / LLM Tooling: Claude API, Gemini, Prompt Engineering, AI Orchestration, LLM-assisted dev workflows

Design Systems: Material 3, Atomic Design, WCAG 2.2 Accessibility, Figma

Testing: Jasmine, Karma, JUnit, Unit & Integration Testing

DevOps / Tools: Docker, Jenkins, Git, GitHub Actions, CI/CD, Vercel, Agile / Scrum

Languages: Spanish (native), English (professional), French (basic)

EDUCATION

B.S. in Software Engineering

2014

Universidad Tecnológica del Valle del Mezquital · Ixmiquilpan, Hidalgo · GPA 4.0
